

## News Release

FOR IMMEDIATE RELEASE

### **Manitowoc Continues Leadership in Environmentally Friendly Refrigerants**

**New Port Richey, FL.** – February 7, 2019 – Manitowoc, Welbilt’s leading brand for commercial ice makers, is pleased to announce the launch of four new R290 Indigo NXT models in Europe (IDP0320A, IYP0320A, IDP0500A, IYP0500A) further strengthening its leadership in offering environmentally friendly refrigerant options for their commercial ice machine platforms. The natural R290 (propane) refrigerant has a GWP (Global Warming Potential) of nearly zero minimizing environmental impact. Additionally, Manitowoc will launch new R290 versions of their popular Neo and Sotto undercounter ice machines in Europe during 2019.

In 2012, Manitowoc was one of the first manufacturers pioneering R290 (propane) models for sale in Europe. This leadership continued with the 2018 global launch of its new Indigo NXT product range utilizing energy efficient R410A refrigerant on most models. R410A refrigerant offers nearly half the GWP (Global Warming Potential) of the previous industry standard R404A.

For more information about the Manitowoc Indigo NXT and Indigo NXT, Neo, & Sotto R290 (propane) models, please visit us at the Welbilt booth #3200 during the NAFEM show, February 7-9 or see our website: [www.manitowocice.com](http://www.manitowocice.com).
